

Grinder Model:

XR-400

Common Applications:

Blocks / End Cuts
Truss / Millwork Cut-Offs
Particle Board

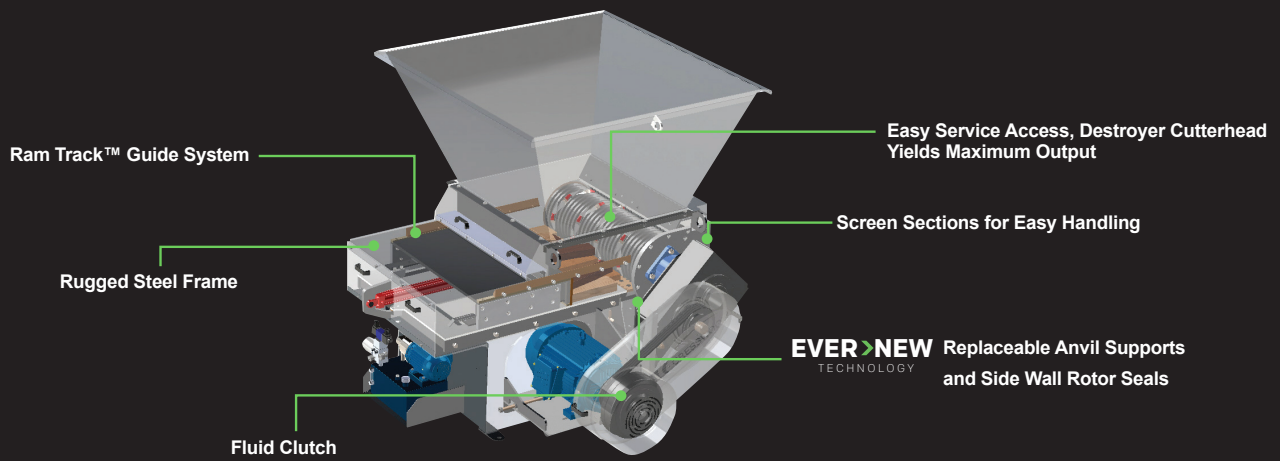

HARDWORKING AMERICAN-MADE MACHINERY

EVER > NEW
TECHNOLOGY

Cresswood's exclusive Ever New Technology allows for replacement of all key wear items to bring your machine back to like-new standards.

The "dump and go" XR-400 is built for strength to grind pallet boards, blocks, chunks, cutoffs, end cuts, particleboard, slabs, and drops. This machine is ideal for millwork, truss, and furniture manufacturing companies. This class of machine features the aggressive, Cresswood exclusive, Destroyer cutter-head to get more throughput. The XR-400 has been designed with a larger ram and a higher capacity cutting chamber than our competition, to more effectively present larger material to the cutterhead.

Specifications

XR-400

Motor HP	40, 50, 60
Cutting Chamber	40" × 42"
Ram Stroke	24"
Rotor Diameter	16"
Grinding Head Speed	50-150 rpm
Frame Thickness	5/8"
Number of Cutter Teeth	72
Shaft Diameter	4"
Mid-Range Hopper Volume	2.5 Cubic Yards
Floor Area of Unit	86" × 76"
Shipping Weight	5,900 lbs.

* Specifications are subject to change

** The output of these machines can be optimized for your application by selecting different screens, amount of cutter teeth, cutter teeth placement, and rotor selection.
